## Foreword

Since the introduction of Coffee Year Book in the crop year 2016/17, the Directorate has been publishing and communicating coffee statistics for consumption by the National Government, County Governments and coffee industry stakeholders. The Directorate is mandated to collect, collate, analyze and disseminate timely coffee industry data to its stakeholders.

The Directorate is therefore proud to share with you the Coffee Year Book 2020/21. Since its first publication, the year book has proved to be a reliable statistical reference point to all stakeholders. This milestone in statistics publication culminates into the Directorate's sustained efforts to consult and engage with stakeholders.

On behalf of the Directorate, I take this opportunity to extend my appreciation to our Ag. Director General, Agriculture and Food Authority, all stakeholders and all staff who contributed in making this publication a reality and hope that you will find this publication resourceful. I especially congratulate both Kie factory (Rung'eto Fcs) and Kiamugumo factory (New Ngariama Fcs) for setting the bar so high in terms of both production and cherry rates in 2020/21.

Eng. Enosh O. Akuma  
Acting Director, Coffee Directorate

## *Acknowledgements*

We wish to thank all coffee value chain players who assisted us with data used in the production of this Coffee Year Book for season 2020/21. We also take this opportunity to appreciate the facilitative role played by the Director in supporting the production of this year book. In addition we recognise the data validation roles played by all head office and regional staff which culminated in the publishing of this year book.

Our sincere gratitude goes to the following staff who played key roles in the compilation this year book.

- Mr Erick Onyuka-Ag. Deputy Director Technical & Advisory Services
- Mr Julius Mutuma-Senior Officer, Technical and Advisory Services
- Mr Calvin Baraka-Assistant Statistician

Edited by;

Mr Paul Okewa-Senior Officer, Market Research and Product Development

## General Indicators

GDP contributions	0.1%
Crop year	October to September
Area 2020/21 (ha)	National (108,199) Estates (25,026) Co-ops (83,173)
Production 2020/21 (Kg)	National (34,512,155.69) Estates (11,671,512.21) Co-ops (22,834,337.48)
Yield 2020/21 (Kg/ha)	National (318.97) Estates (466.37) Co-ops (274.54)
Total value of production 2020/21 (US dollars)	203.25 Million (Ksh 18.9 Billion)
Total Export volume 2020/21 (Kg)-GBE	41,796,759.93
Total Export value 2020/21 (US dollars)	292,257,245.68
Total Export value 2020/21 (Ksh)	27,071,670,776.57
Total No Bags Exported in 2020/21 (60 Kgs)	696,613
Export average price per 60 Kgs bag (US dollars)	419.54
Top 5 export destinations (60-Kgs Bag)	Belgium (148,805 bags)-21 % USA(102,794 bags)-15% Germany(92,455 bags)-13% South Korea (67,324 bags)-10% Sweden (49,193 bags)-7%
Total Import volumes 2020/21 (Kg) and bags	658,929.27(10,982)
Total import value 2020/21 (US dollars)	2,684,989.75
National average cherry payout rate 2020/21 (Ksh/Kg)-Weighted	86.79
Highest cherry rate in Ksh/Kg	Kirinyaga County (Kibirigwi FCS-Thunguri Factory)-118.60
Nairobi Coffee Exchange volume 2020/21 (Kg) and bags	25,125,678.00 (407,432 -50 Kg bags)
Nairobi Coffee Exchange value 2020/21 (US dollars)	141,240,377.46
Nairobi Coffee Exchange average price 2020/21 (US dollars per 50 Kgs bag)	281.07
Direct Sales volume 2020/21 (Kg)	10,488,332.00
Direct Sales value 2020/21 (US dollars)	68,573,243.00
Direct Sales average price 2020/21(US dollars per 50 Kgs bag)	326.90
Flowering periods	Fly or early crop in September/October Main or late crop in February/March
Weighted National average price/50 Kgs bag (Auction +Direct Sales)	294.57
Harvesting periods	Fly crop in May to July Main crop in September to December
Marketing periods	Fly crop in July to January Main crop in December to August
Ratio of Fly: Main crop	45:55
Ratio of Estate: Smallholder production	31:69
Number of active co-operatives/factories	500/967
Number of active estates	2,521
Domestic consumption level (MT) and bags	1,655.85 (27,598 -60 Kg bags)

# Executive Summary

In season 2020/21, the coffee sub-sector recorded low production performance of 34,512 Metric Tons of clean coffee (cc). The overall production growth declined by 6.4% from 36,873 Metric Tons recorded in 2019/20. The poor performance was attributed to the effects of COVID-19 pandemic and unpredictable weather patterns coupled with erratic rains during the year under review.

The negative impact of the decline was particularly felt among smallholder farmers aggregated in co-operative societies where production declined by 11.8% from 25,901 Metric Tons in the previous year to 22,841 Metric Tons in 2020/21. However, a positive production growth of 6.4% was recorded among the estate farmers, from 10,972 Metric Tons in the previous year to 11,672 Metric Tons in 2020/21. This is because the most of the estates have dams which they use for irrigation during the time of drought as opposed to smallholders who depend on rainfed coffee production.

Multiple production factors such as poor weather conditions, inadequate application of farm inputs by smallholder farmers and change of land use from coffee farming to real estates among others affected overall coffee production. It is also widely known that coffee yields are cyclical in nature.

The general decline in area under production of coffee from 119,675 Ha in 2019/20 to the present 108,199 Ha indicates the magnitude in shift of land use from coffee farming to real estates and other competing enterprises. The smallholder producers' area under coffee was the most affected having declined by a whopping 8% from 90,898 Ha in 2019/20 to 83,173 Ha in 2021/22 due to household land subdivision for settlement, urbanization and change in land use.

Similar trends were witnessed in the volumes of coffee exported which declined from 46,162 Metric Tons (769,361-60 Kg bags) in 2019/20 to 41,589 Metric Tons (693,144-60 Kg bags) in 2020/21 valued at \$209.82 Million (Ksh 22.02 Billion) and \$292.26 Million (Ksh 27.07 Billion)

respectively. The in volumes decline in volumes exported appeared to be correlated with the low production while the increase in value was due to the global market dynamics.

The gross margin analysis conducted by Coffee Research Institute (CRI) in season 2020/21 established that in Nyeri County, the costs of coffee production at levels; 2.00 Kgs, 5.00 Kgs and 10.00 Kg were Ksh 51.13, Ksh 33 and Ksh 32.28 per tree respectively. Whereas in Machakos County, the production costs per tree were Ksh 47 Ksh 36.03 and Ksh 31 while in Tharaka Nithi County the production costs were Ksh 51.43, Ksh 34.31 and Ksh 26.10 at similar levels. These results indicate that as the farmers increase production per tree, the cost of production decreases because of economies of scale.

The total value of marketed coffee increased by 30% from US\$161.04 million in period 2019/20 to US \$209.48 million in season 2020/21 although the export volumes decreased by 7% from 38,052 Metric Tons in 2019/20 to 35,570 Metric Tons in the year under review.

According to KNBS, the coffee sub-sector's real Gross Value Added (GVA) was estimated to have contracted by 12.6 % in period 2020/21 compared to 2.5% growth experienced in period 2019/20. This eroded the contribution of the crop to the agricultural sector and towards the National GDP.

The Government of Kenya takes cognizance of the strategic role played by the crop towards poverty alleviation, economic empowerment, foreign exchange earnings, food security as well as job creation, among other contributions to the economy. However, in the last two decades, the sub-sector has encountered a number of challenges which led to His Excellency the President of the Republic of Kenya to appoint a Task Force in the year 2016 whose recommendations formed the basis upon which various reforms have been undertaken in the industry.

## Introduction

This year book will be communicating on the various value chain levels from production, processing, milling, grading, marketing, promotions and also domestic consumption. In each of these levels of the coffee value chain, statistics is provided in both quantities and values alongside the crop situation.

In order to increased transparency in the sub-sector it is important to share facts with the stakeholders. Besides, coffee is an important crop nationally and internationally and a booming coffee sectors is a key driver of the local economy which in turn leads to increased income for coffee growing households in Kenya on the other hand poor performance of the sector leaves farmers with no options except to abandon growing of the crop leading to depressed production and income.

During the Directorate's interaction with the stakeholders, various issues were raised which included high costs of production especially inputs such as fertilizers, chemicals, planting materials, illegal coffee deals, theft of coffee from the societies' stores, limited access to credit facilities, aging farmers, fluctuations in the coffee prices, low productivity across both estates and societies and poor governance in farmers institutions.

In response to these challenges, various programs geared at full revitalization of the subsector have been initiated through the

Ministry of Agriculture, Livestock, Fisheries & Co-operatives and the Coffee Directorate in collaboration with the County governments in the coffee growing areas. Some of the reforms include; the World Bank funded coffee revitalization program, cherry advance revolving fund, provision of subsidized fertilizers, the E-Voucher and review of coffee Industry legislations. Also the Directorate in collaboration with the county governments has been engaging the smallholder farmers to include youths and women in coffee production and management of their institutions.

Coffee production in the country is influenced by factors which include: weather related conditions, agricultural practices, prevailing global prices, climate change, government policies and farm input support programs.

In the year 2020/21, a bigger proportion of clean coffee (cc) was produced by the smallholder farmers (66%) as compared to the Estates (34%). In general, the number of active growers was 3,020 out of which estate growers were 2,520. Production by all the sectors declined by 6.4% from 36,873 Metric Tons recorded in 2019/20 to 34,512 Metric Tons in 2020/21. The decline in quantities of coffee produced was attributed to the prolonged dry spells experienced between the months of January-April 2020.

The period experienced intermittent rainfall that led to flowering which ended up dying. This in return affected the second crop despite the regions receiving consistent rainfall from May 2020 leading to subdued flowering of the main crop in both the middle and lower coffee zones. The high cost of farm inputs led to inadequate application of the same by smallholder farmers and also the biennial bearing cycle of Arabica coffee trees led to low production of the crop compared to season 2019/20. Some of the coffee processing factories located in the lower zones had to close all together due to lack of cherry deliveries.

The dominant smallholder coffee sector is heavily reliant on either provision of farm inputs on credit terms by their societies or through provision of subsidized farm inputs by the National and County Governments and hence in the case of non-provision, the crop is undernourished leading to suppressed production levels. In the period under review, the effect of Covid-19 pandemic was also felt across all the sector's value chain. The pandemic resulted in restricted movements of planting materials, limited farm visits by regional extension officers, short working hours, low value addition and this led to attendant costs such as labour, transport and farm inputs to increase.

The effects of the pandemic led to restricted trading measures being put in place at the Nairobi Coffee Exchange (NCE) which limited the number of marketers and buyers participating at the coffee auction. In order to mitigate against the low trading activities, the auction system was migrated to an online platform which did not pick immediately thus presenting buyers with uncertainty leading low supply of coffee for export.

Coffee estates were forced to adjust their cherry picking time while the smallholder coffee factories resorted to short processing times whereas milling companies were also forced to adjust their milling timetabling due to suppressed parchment and buni deliveries.

Throughout the entire year, stakeholder engagement forums were stopped following the ban on public gatherings by the National Government and working at home became the new normal. The pandemic also affected the operations of the 506 coffee consumption outlets as coffee takers remained indoors due to the restrictions.

## Coffee Production

In this section we examine coffee production aspects in the country under the current regulatory framework which recognizes the Estates and Smallholders. Further, we compare the current production status with the previous period 2019/20 and also provide historical trends in Appendix 1 and 3.

Production is presented both in cherry for smallholders and in clean coffee for both estates and smallholders. It is important to mention the existence of parallel producers who are neither classified under estates nor societies but who have been included under societies due to their unique characteristics. These producers use ZA's codes to deliver their coffee produce to respective milling companies.

The Directorate is in discussions with respective County Governments to assign official codes to these producers under either estates or societies. Similarly, area under coffee is also reviewed in this section as well as the crop estimates for 2021/22.

## Cherry Production and Payout Rates

Whereas there is still a potential for increased cherry production in the estate sector, the greatest potential for increasing cherry production in the counties lies in the smallholder sector. It is only in some counties like Kiambu and Nairobi where production is predominantly by estates. In the rest of the 30 counties, the smallholder sector is driving the overall production.

The total weight of cherry produced in the country was 179,957,367.96 kilograms in the year 2020/21 out of which the smallholder sector contributed 119,098,388.74 kilograms of cherry valued at Ksh 10.3 Billion. The national weighted average cherry rate for 2020/21 was Ksh 86.79 per kilogram for the two crops (1st crop and 2nd crop or early and late crops) combined to obtain one standard index (rate) comparable to regions with only one crop.

The highest cherry rate was Ksh 118.60 paid by Kibirigwi FCS-Thunguri factory in Kirinyaga County while the lowest cherry rate was Ksh 10.00 paid by Ogera FCS-Ogera factory in Homa Bay County. In general more than 70 factories paid Ksh 100.00 per kilogram of cherry. The disparity in payout rates is mainly attributable to poor financial management since some co-operatives suffer from poor labor management, low capacity utilization, high operation costs, high indebtedness, low volumes of deliveries, and inefficiencies in processing of the crop among other constraints. Coffee payout to farmers' have gradually recovered from the low prices in the last five years due to the drop in coffee supply and demand upsurge in the world market.

Coffee prices have improved over the years following the drop in production by major coffee producing countries and also due to the effect of depreciation of the Kenya shilling which has nosedived in the last two years.

Other co-operatives also perform poorly because farmers divert the delivery of cherries to other societies in order to avoid repayments of loans owed to lenders. In order to cope with the challenges of low payouts, farmers have resorted to intercropping coffee with crops like beans to boost their food security situations and incomes. Although trading in cherry is prohibited in the Crops Act, one appreciates that the need for farmers to sell cherry to private traders or middlemen is out of desperation arising from long cycle in the coffee marketing chain. Trading in cherry may on the other hand encourage exploitation of farmers by the illegal dealers, coffee thefts and also compromises the quality of coffee.

It is evident that smallholders who have been selling cherry through illegal channels are losing money while those that have fully adhered to regulations have been quite successful and in response have increased quality of coffee, quantity and area under coffee occasionally earning very good prices.

The top five co-operatives which paid good prices in 2020/21 include Rung'eto FCS-Kiangoi factory (Kshs 118.60), Kibirigwi FCS-Thunguri factory (Kshs 118.55), Ngugu-Ini factory (Ksh 116.10), New Ngaria-ma FCS-Kainamui factory (Kshs 113.62) all in Kirinyaga County and Othaya FCS- Ichamama factory (Kshs 113.70) in Nyeri County. Table 1 provides an overview of smallholder sector cherry production, payout rates and number of societies/factories per country.

Table 1: Smallholder cherry production, net value and rates

No.	County	Total cherry(Kg)	Net Proceeds (Ksh)	Lowest Rate (Ksh/Kg)	Highest Rate (Ksh/Kg)	Weighted Average Rate Ksh/Kg	No Societies	No Factories
1	Kirinyaga	29,086,676.15	2,968,293,806.83	50.10	118.60	102.05	15	73

Eleven (11) factories out of 967 active factories reported a production of over 1.0 million Kilograms of cherry each and the range of payout rate was between Kshs 82.00 to Kshs 112.85 per kilogram of cherry. These factories which performed exceptionally well in season 2020/21 are; Ndaro-ini, Baragwi (Guama), Rung'eto (Kari-mikui), Barichu (Gatamboya), Gikanda (Kango-cho), Thirikwa (Gakuyu-Ini), Rung'eto(Kie), New Ngariama (Kamwangi), Kapsaos (Toretmoi) in Nandi county and Kangunu (main). This affirms the thinking that there is correlation between volumes produced and payout rates. While coffee payout rates varied widely, from one society to another and from one region to another it was evident that most factories from Kirinyaga and Nyeri Counties performed better than their counterparts in other regions.

Some of the co-operatives which traded in parchments have been displayed after the payout rates were converted into equivalent cherry rates. These cooperatives are Wikurire in Nakuru County, Kapkolei in Nandi, Talai in Baringo, Bituti and Mwamba in Trans Nzoia, Turbo in Uasin Gishu, Kocholwo and Kormut in Elgeyo Marakwet, Nuru in Kakamega, Kithutmo and Bomet West in Bomet County, Kotney in West Pokot and Ngarua in Laikipia.

Following, the expansion of Robusta coffee in Busia, Bungoma, Siaya, parts of Kisumu and Homa Bay aimed at providing farmers in these counties with alternative cash crop, some of the trees are presently mature and the crop is being harvested but the expansion programme is still not supported with elaborate policies on production, processing and marketing. Even though, it was reported in season 2020/21 that

the Robusta coffee produced in Bungoma County was milled by Mt. Elgon Coffee Mills Company, there are concerns that it may not have been graded as per the Robusta coffee standards. The milling company did not have the recommended grading system for Robusta coffee.

The co-operatives in Busia County such as, Apokor, Nambale and Namwitsula sold their Robusta coffee to a private trader –Café Del Duca at the price of Ksh 35.00 per kilogram. Robusta production in Siaya and parts of Kisumu County are also mopped up by private traders due lack of an organized marketing system for Robusta coffee.

In general, the Robusta coffee production has been lower than predicted and has not attracted potential investors in anticipation large increase in volumes produced. In Vihiga County, the small quantities produced were sold directly to a private buyer because the volumes fell below the profitability threshold.

Table 2 provides details of the highest and lowest payout rates in each of the coffee producing counties as well as names of the factories.

The best two performing factories in the entire Country in 2020/21 season based on both coffee production and prices are Rung'eto FCS-Kie factory which produced 1.04 million Kilograms of cherry and paid Ksh 112.85 per Kilogram followed by New Ngariama FCS-Kiamugumo which produced 0.8 million Kilogram of cherry and paid Ksh 111.25 per Kilogram. Kie factory received net proceeds worth of Ksh 117.9 million

Table 2: Table below provides the highest and the lowest payout rates per county by society/factory 2020/21

No	County	Name of Factory	Highest(Ksh)	Name of Factory	Lowest(Ksh)
1	Kirinyaga	Kibirigwi FCS-Thunguri	118.60	Mwirua FCS-Rwamuthambi	50.10
2	Nyeri	Othaya FCS-Ichamama	113.70	Giakanja FCS-Giakanja	37.00

from the sale of cherry while Kiamugumo factory received Ksh 89.5 million.

A comprehensive cherry production and payout rates tabulation for all smallholder sector farmers in season 2020/21 is provided in the Appendix 5.

# Coffee Processing

This section examines coffee processing and makes observations on the existing coffee processing situations in the country, identify the current players in secondary processing, their processing capacities and the contributing counties.

It is common knowledge that most postharvest losses occur at the processing which begin with cherry selection and sorting at the farm level.

## Parchment Processing

During primary processing, coffee is pulped, pre-washed and pre-graded into first, second and lights at the factories then fermented, washed and sun-dried to produce parchments which is then stored at the factory level. Parchment consignments are dispatched to the respective milling companies using the coffee movement permits which are essential documents required for monitoring and accounting for coffee in transit. The County Governments in the coffee growing areas are now responsible for issuance of parchment and buni coffee movement documents under the existing regulations.

## Clean Coffee Processing

In the Country, both the dry or wet processed coffee is hulled, polished, graded and sorted. Before milling, pre-milling samples are obtained from each outturn for purposes of quality assessment to assist in providing milling instructions and monitoring of coffee classifications. Also coffee is bulked to obtain millable lots and after hulling and polishing, clean coffee is mechanically graded in terms of size, shape and density into main grades; AA, AB, C, E, PB, T, TT or Miscellaneous grades; HE, SB, UG, UG1, UG2, UG3 or Buni(unwashed) grades; MH and ML.

The grading is done in accordance with the market requirements and acceptable standards recognized by the International Coffee Organization (ICO). Graded coffee is sorted by removing defective beans for reasons of improving quality. Milled coffee further undergoes sorting, weighing, bagging in export bags, labelling, sealing and then transported to warehouses using clean coffee permits.

## Clean Coffee Production

In the 2020/21 season, parchment coffee milling was undertaken by 21 active milling companies as shown in Table 3. However, no audit has been undertaken lately by the Directorate to establish the actual national milling capacity for the over 21 milling companies although there are reasons to believe that it could running in excess of over 250,000 Metric Tons.

With the declining production, all the milling companies are idle most of the time and operate below their full potential thus denying the youths job opportunities.

In Table 3, milling companies and their respective milling share have been provided. The Neumann Kaffee Gruppe (NKG) coffee mills accounted for 25% of the national milling share, while Central Kenya Coffee Milled 17% followed by Kofinaf Coffee Mill Ltd (17%), Sasini Limited PLC (12%) and Kahawa Bora (11%). Other milling companies with significant shares include CMS-Eldoret (4%), Kipkelion District Co-operative Union Mill (3%) and Thika Coffee Millers (3%).

Table 3: Clean coffee production by milling companies 2020/21

	<b>Total</b>	<b>31,622,851.89</b>	<b>2,882,997.81</b>	<b>34,505,849.69</b>	<b>6,306.00</b>	<b>34,512,155.69</b>	<b>100%</b>

Notes: The inclusion of Busia Robusta Coffee FCS among the milling companies was to justify the processing of Robusta coffee

from Busia and Siaya.

Geographically, Kenya's soil is suitable for the production of both Arabica and Robusta coffee. While Arabica coffee production is suitable in most of Kenya's soils and majority of the counties. Robusta coffee production is gaining popularity along the Lake Victoria basin covering Siaya, Kisumu, Homa Bay and parts of Bungoma. Table 4 shows that the country produced 34,505,849.69 Kg (99.9%) of clean Arabica coffee compared to only 6,306 Kg (0.1%) of clean Robusta coffee in 2020/21 thus the total production for the season was 34,512,155.69 Kg.

Coffee production figures show that the top four counties nationally are from Mt Kenya region namely; Kiambu, Kirinyaga, Nyeri and Murang'a contributed 20,626 Metric Tons (60%) of the national production. Among the top two counties, the production in Kiambu was pre-dominantly from estates while in Kirinyaga smallholder farmers dominated. Kericho and Bungoma which emerged in position 5 and 6 respectively have increased their area under coffee production in the last five years and recorded a remarkable increase in production. Other coffee growing strongholds are Meru, Embu, Nandi and Tharaka Nithi as shown in Table 4.

CC-Clean Coffee

Season 2020/21 recorded low production of 34,512 Metric Tons compared to 36,873 Metric Tons recorded in 2019/20 as illustrated in Table 5. This indicates a decline in national production by 6.4%, the production from estate sector increased from 10,972 Metric Tons to 11,672 Metric Tons (6.3%) while co-operatives decreased from 25,901 Metric Tons to 22,841 Metric Tons (11%).

The increase in the estate sector production was due to use of dams for irrigation to mitigate the effects of the drought and timely application of farm inputs while decline recorded in co-operatives was attributed to inaccessible GoK subsidized fertilizer, low application of inputs as a result of low payout rate in previous season and drought which affected nearly all parts of the country.

A comprehensive clean coffee production tabulation for individual growers in season 2020/21 is provided in the Appendix 6.

## Value of clean Coffee

There was a 30% significant rise in value of coffee produced in 2019/20 from US \$156.04 million (Ksh 16.4 Billion) to US \$203.25 million (Ksh 18.9 Billion) in 2020/21 as shown in Table 6. This can be attributed to improved global prices and low of coffee supplied hence increased demand. The historical trends for value of produced coffee is provided in Appendix 2.

Table 6: Value of produced coffee in US dollars 2019/20 and 2020/21

## Gross Margins Analysis

In this section, we provide the estimated costs and revenues for selected counties of Nyeri, Machakos and Tharaka Nithi.

One of the main constraints of coffee production in the country is the high cost associated with production. This coupled with high inflation rates and depreciation of Kenya shillings against the dollar have led to increased operational costs like lease of land, planting, herbicides, fungicides, insecticides, pruning, weeding, fertilizer/chemicals, hand picking, transport among others and consequently a reduction in yields. When coffee profits decline, the production incentives are eroded resulting in food insecurity in the coffee growing households. In Appendix 7, we provide an example of production cost centre and returns per Acre for a Nyeri county smallholder farmer with 80 mature trees of Batian variety.

The cost items include a comprehensive breakdown for fertilize application, pesticides application, labour, canopy management, harvesting, transportation, statutory deductions (20% by the society) among other costs.

Table 7 shows the cost of production at 3 production levels (2.01 Kgs, 7.3 Kgs and 10 Kgs) from farmers in five cooperatives in Nyeri County namely Mutheka, Rutuma, Mugaga, Ruthaka and Othaya.

The farmers who produced at 10 Kgs per tree had the lowest cost of production per tree of Ksh 32.28 per tree, followed by the farmers with 7.3 Kgs per tree, production cost of Ksh 32.70 per tree and 2 Kgs per tree with a production cost of Ksh 51.13 per tree respectively as per economies of scale, the higher the production the lower the costs.

The net revenues per acre in the 3 levels were Ksh 40,418.00, Ksh 81,653.00 and Ksh 634,760.31.

Most farmers in Nyeri County had either planted Ruiru 11 or had top worked SL Variety with Ruiru 11 and were found to be spraying against CBD and CLR irrespective of either having elite or traditional varieties.

Table 8 shows the cost of production at 3 production levels (2.7, 5 and 10 Kgs) from farmers in three Machakos County cooperatives namely Mukuyuni, Kakuyuni and Kambusu.

The farmers who produced at 10 Kgs per tree had a cost of production per tree of Ksh 36.03, followed by the farmers with 5 Kgs, production cost of Ksh 31 per tree and 2 Kgs with a production cost of Ksh 47.00 per tree respectively.

The net revenues per acre for the three levels were Ksh 19,046.00, Ksh 79,300.00 and Ksh 188,294.00 respectively. Most farmers in this County had SL 28 (traditional varieties) that are susceptible to Coffee Berry Disease (CBD) and Coffee Leaf Rust (CLR), and were using fungicides that are expensive to manage these two diseases.

The payout rates per Kg of coffee in Machakos cooperatives were lower (Ksh 80.00 and 50.00 respectively) compared to Nyeri County where the lowest payout rate per Kg of coffee was Ksh 83 and a highest of Ksh 103 therefore affecting the gross revenues in the 3 production categories.

Table 9 shows the cost of production at 3 production levels (1.14, 4.1 and 7.8 Kgs) from farmers in three cooperatives in Tharaka Nithi County namely Iriga, Ndunguri 98 and Kirubia.

Table 7: Costs and Revenues- Nyeri County

Parameters	Production Levels per tree		
	2.01 Kgs	7.3 Kgs	10 Kgs
No. of trees	290	175	887.50
Acreage	1.33	0.10	1.52
Total production	668.33	1287.50	8,798.13
Production per tree	2.01	7.30	9.69
Payout rate	92.50	93.30	97.56
Gross Revenue	65,166.83	122,394.50	888,511.56
Total cost	24,608.67	40,741.50	253,751.25
Total cost/ tree	51.13	32.70	32.28
Net revenue	40,558.17	81,653	634,760.31
Net revenue per tree	41.37	60.6	65.28
Net Revenue per acre	30,418.63	752,562.2	416,919.75
% production cost	38.00	33.00	28.56

Table 8: Costs and Revenues Machakos County

Parameters	Production levels per tree		
	2.7 Kgs	5 Kgs	10 Kgs
No. of trees	595	467	74
Acreage	1	1	0.21
Total production	846	2,860	2,164
Production per tree	1	6	9.50
Payout rate	65.00	60.00	50.00
Gross Revenue	65,148.00	174,000.00	108,200.00
Total cost	48,244.00	86,770.00	68,187.50
Total cost/ tree	47.00	31.00	36.03
Net revenue	16,904.00	87,230.00	40,012.50
Net revenue per tree	18.00	25.00	13.97
Net Revenue per acre	19,046.00	79,300.00	188,294.12
% production cost	74.00	50.00	63.00

Source: Coffee Research institute

The farmers who produced at 7.8 Kgs per tree had the lowest cost of production per tree of Ksh 26.10 per tree, followed by the farmers with 4.1 Kgs the cost of production was Ksh 34.31 per Kg and the farmers with a production of 1.14 Kgs per tree, the production cost was Ksh 51.43 per tree respectively.

Most farmers in this County have adopted Batian and Ruiru 11 varieties that are resistant to Coffee Berry Disease (CBD) and Coffee Leaf Rust (CLR), and therefore reducing the costs of fungicides that are expensive to manage these two diseases.

The average payout rates per Kg of coffee in Tharaka Nithi cooperatives were (Kirubia 68.00, Ndunguri 60.00 and Iriga 71.00 respectively) compared to Nyeri County where the lowest payout rate per Kg of coffee was Ksh 83.00 and a highest of Ksh 103 therefore affecting the gross revenues in the 3 production categories.

From the analysis above, it can be concluded that for the coffee business to be viable, farmers need to increase production per tree. The results show that as the farmers increase production per tree, the cost of production also decreases because of economies of scale.

There is a positive relationship between production and payout rates, as production increases in the co-operatives, quality of coffee also improves and the cost of operation decreases resulting in increased payout rates to the farmers.

Table 9: Costs and Revenues Tharaka Nithi County

Parameters	Production levels per tree		
	1.14 Kgs	4.1 Kgs	7.8 Kgs

## Crop Estimate 2021/22

The Directorate conducted crop estimates to ascertain the potential tonnage for season 2021/22. It was projected that clean coffee production will increase by 29% from the present 34,512 Metric Tons to approximately 45,000 Metric Tons.

The expected rise will be contributed by 22% from the estates and further by 32% from smallholder farmers. This shows that efforts to revitalize the coffee industry should focus primarily on the smallholder coffee farmers.

Focusing on the counties, production from Meru is expected to outstrip Embu while Kisii is expected to overrun Nakuru, Trans Nzoia and Machakos. Nairobi is likely to stagnate or reduce drastically due to pressure being exerted by the real estates. Uasin Gishu and Migori are expected to increase their production following recent expansion though marginally.

The production for West Pokot will overtake Kisumu while Homa Bay is expected to dethrone both Bomet and Kakamega due to Robusta coffee expansion and maturity of new crop. Marginal coffee producers like Siaya and Vihiga are expected register some increase in production as shown in Table 10.

Although the projected growth in Kiambu, Kirinyaga, Nyeri and Murang'a may seem insignificant compared to other regions, it is important to note that these counties remain the country's coffee production strongholds and any slight variation in production variables can impact significantly on the overall increase or decline in national production.

Table 10: Crop projection in Metric Tons 2021/22 (cc)

No	County	Estates		Co-operatives		Total		% -Variance

## Coffee Area

The area under coffee production from 45,438 Ha in 1963 to 170,000 Ha in early 1990s before declining to 109,000 Ha in 2008/09. It further increased to 119,675 Ha in 2019/20 then declined to the present 108,199 Ha in 2020/21. While the increase between 2013/14 and 2019/20 was mainly due to the National and County governments' interventions, the most recent decline is due to shift in land usage especially in counties bordering Nairobi city the capital of Kenya and human settlement pressure in the traditional coffee growing areas. Area under coffee in the smallholder and estate sectors by county for season 2019/20 and season 2020/21 are shown in Table 11. A much detailed analysis of the area is provide in appendix 3

Table 11: Area under coffee production (Ha) The reduction in area under coffee was mainly due to coffee uprooting to make way for real estates in coffee farming areas near urban centres in the

traditional growing areas (Kiambu, Thika, Makuyu, Ruiru, Kabete, Limuru, Muranga, Nyeri, Meru, Machakos etc). The country reported 3,357.50 Ha under new plantings in 2019/20 in addition to the established area of 116,317.50 Ha. Total area under coffee therefore increased to 119,675.00 Ha. However, there was a massive decline to 108,199 Ha in 2020/21 compared to previous years.

Although there has been reported expansion in areas such as Kericho, Elgeyo Marakwet, Nandi, Trans Nzoia, Migori, Bomet and Bungoma due to ICPI initiative and county government seedlings distribution, many splits in the co-operative sector, and conversion of land use especially in Central Kenya and Upper Eastern have been led to the declined production registered. Further threat in coffee production has been attributed to competing enterprises like bananas and khat farming.

Table 11: Area under coffee production (Ha)

No	County	2019/20			2020/21		
		Estate	Co-op	Total	Estate	Co-op	Total
1	Kiambu	12,627.00	10,520.00	23,147.00	11,724.00	8,585.00	20,309.00

## Coffee Yields

The average coffee yields vary between the smallholder and estate sectors as shown in Table 12. According to Coffee Research Institute (CRI), in 1988/89, the average yield per tree was 6 Kg compared to the current 2 Kg/tree. According to Table 12. The average yield increased from 0.442 Metric Tons per Ha to 0.468 Metric Tons per hectare for estates while cooperatives also increased from 0.273 Ton per Ha in 2019/20 to 0.274 Metric Tons per Ha in 2020/21.

The overall national yield for both estates and cooperatives also increased from 0.308 Metric Tons/ha to 0.319 Metric Tons/ha in 2019/20 and 2020/21 respectively as can be seen in Table 12. The increase in average yield in 2020/21 was mainly due to the scaling down of area under coffee after a validation exercise between State department of crops, KNBS and AFA-Coffee Directorate.

Table 12: Average yield of coffee 2019/20 and 2020/21

Years	Area (Ha) '000'		Production (Metric Tons) '000'		Average Yield (Ton/Ha)	
	2019/20	2020/21	2019/20	2020/21	2019/20	2020/21
Co-ops	94.80	83.20	25.90	22.80	0.273	0.274
Estates	24.90	25.00	11.00	11.70	0.442	0.468
Total	119.70	108.20	36.90	34.50	0.308	0.319

# Coffee Marketing

This section examines the existing coffee marketing systems, the volumes which have been offered and values earned through the marketing systems. The two prominent systems in Kenya are the Auction (Nairobi Coffee Exchange) and Direct Sales. After coffee is processed at the mill, it is classified, bulked and warehoused.

The marketers offers it for sale on behalf of the growers through the centralized coffee auction system to coffee buyers through competitive bidding. After bidding, the marketers subsequently invoices the coffee buyers who in turn pay the marketers. Upon the receipt of the payouts, the marketers remit the same to growers after deducting the marketing costs, warehousing costs and milling charges. Coffee offered through direct sales bypasses does not incur the auction charges.

The total marketed weight in 2020/21 at the auction and through direct sales declined from 38,051,440.81 Kg in 2019/20 to 35,614,010.00 Kg while the value for 2020/21 also shot up to US \$209,813,620.46 from US \$161,036,119.15 in the previous season. The average weighted price for the two windows in the present period was higher at US \$294.57 per 50 kg bag compared to US \$211.60 in 2019/20.

Tropical Farm Management Kenya Ltd (TFMK) was the overall market leader controlling nearly 30% of the total market share. However, the overall best average price of US \$329.30 per 50 Kg bag was realized by Kenya Co-operative Coffee Exporters (KCCE) while the overall least price of US \$251.02 per bag was reported by Thika Coffee Marketing (TCM) as illustrated in Table 13.

Table 13: Overall marketers performance (Auction and Direct Sales)

## Coffee Auction 2019/20 and 2020/21

A total of 25,126 MT (407,432 bags) of coffee valued at US dollars 141.2 million was sold at the Nairobi Coffee Exchange in 2020/21 compared to 24,531 MT (398,029 bags) valued at US \$ 92.8 million in 2019/20. The average price per 50 Kg bag increased from US \$ 189.06 in 2019/20 to US \$ 281.07 in 2020/21 as shown in Table 14. The increase in prices at the auction was attributed to the favourable global prices due to low supply.

Table 14: Monthly volumes, values and average prices 2019/20 and 2020/21

Month	No. Bags Bought	Wgt Bought(MT)	Min(\$)	Max(\$)	Value(\$) million	Avg PRICE(\$)
<b>2019/20</b>

Source: Nairobi Coffee Exchange (NCE)

The prevailing coffee global prices are subject to forces of demand and supply thus auction prices are influenced to a larger extent by global coffee prices at the Intercontinental Exchange (ICE) and London (LIFFEE). The weighted average price for individual grades are reported in Table 15.

Table 15: Auction price in US dollars per bag for all grades 2016/17 to 2020/21

Average prices of grade AA, PB and AB as well as C are generally above those of other grades as depicted in Table 12. Average prices for individual grades in 2020/21 were significantly higher than prices in 2019/20 but almost comparable to prices realized in 2016/17. In terms of coffee categories, the main grades comprising of AA, AB, C, E, PB, T and TT fetched an average price of US \$308.14 per bag in 2020/21 compared to US \$213.46 per bag in 2019/20.

The volume of main grades was 21,649 Metric Tons in 2020/21 valued at US \$133.4 million compared to 19,916 Metric Tons valued at US \$85.02 million in the previous season. Similarly, miscellaneous grades totalled to 1,220 Metric Tons valued at US \$3.5 million in 2020/21 compared to 1,910 Metric Tons valued at US \$3.5 million. The unwashed grades volume was 2,257 valued at US \$4.3 million in 2020/21 compared to 2,706 Metric Tons valued at US \$4.2 million. Table 16 and 17 provide the coffee category, grades, volumes and values.

The volume of main grades at the auction increased from 81% in 2019/20 to 86% in 2020/21. Whereas that of miscellaneous reduced from 5% in 2020/21 compared to 8% in 2019/20. Unwashed grades accounted for 9% in 2020/21 compared to 11% in 2019/20. In terms of grades, the bulk of sales were grade AB (39%) followed by AA (26%), C (11%) and PB (5%) in 2020/21 compared to AB (36%) followed by AA (16%), C (17%) and PB (5%) for main grades. Among the miscellaneous grades, both HE and UG1 were the dominant grades while MH and ML contributed 7% and 2% respectively in 2020/21. Kenyan coffee is therefore predominantly wet processed.

The average prices per 50 kg bags for grade AA was US \$339.63 in 2020/21 compared to US \$311.31 in 2019/20. However the maximum price was high at US \$512 in 2019/20 compared to US \$500 in 2019/20.

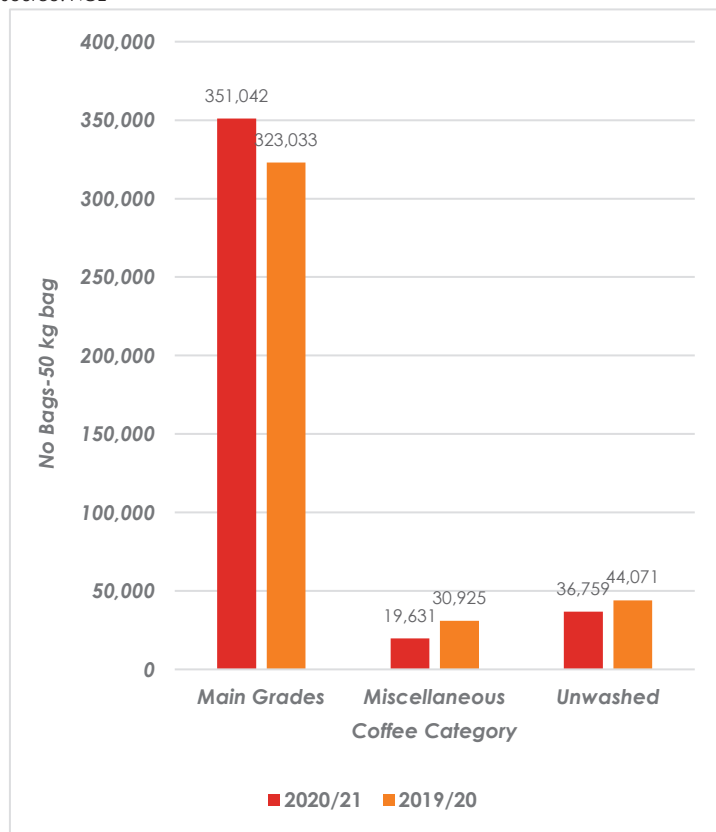

Figure 1: Performance by category in bags

## Marketers' Performance-Auction

The entry of NKPCU marketing company at the auction increased the number of marketers to 11 in 2020/21 up from 10 marketers in the previous season.

The leading marketer at the auction in 2020/21 was Tropical Farm Management Kenya Ltd (TFMK) with 106,750 bags (26.1%) of the overall marketing share while in 2019/20, the leading marketer was Coffee Management Services with 88,962 bags (22%) of the overall market share.

The best average price in 2020/21 of US \$312.64 per 50kg bag was offered by Classic coffee Ltd compared to US \$206.50 per bag offered by TFMK in 2019/20.

In general, the average prices realized by the marketers in 2020/21 were higher compared to prices realized in 2019/20.

In Table 18 and 19 we also observe that the number of marketers increased to 11 in 2020/21 compared to 10 in 2019/20.

## Coffee Buyers

There were 51 coffee buyers at the auction in 2020/21 compared to 49 in 2019/20. In 2020/21, the top 10 buyers at the auction accounted for 83% compared to 86% in 2019/20. Other buyers accounted for the difference. The four main buyers in both 2019/20 and 2020/21 are C. Dorman Ltd, Taylor Winch Ltd., Kenyacof Limited and Ibero (K) Ltd. While TFMK, CMS and Aristocrats increased their market share in 2020/21, all the remaining marketers lost appeared to have lost.

## Direct Sales

A total of 10,444 MT of coffee was sold via direct sales (second window) during 2020/21. This was 23% lower than 13,521 MT sold in 2019/20 period. In general, volumes sold through direct sales have increased over years from 18% to current 29%. However in 2019/20, the proportion of direct sales was slightly higher than 2020/21 by 7%. All clean coffee grades including MH and ML were sold through direct sales alongside the premium grades (AA, AB, E & PB).

Table 21: Direct Sales for 2019/20 and 2020/21

Year	No of bags	Weight Bought (MT)	Value-US dollars (Million)	AVG price /50 KG
2019/20	225,355	13,521	68.28	252.48
2020/21	209,767	10,488	68.57	326.90

Seven (7) marketers participated in direct sales in 2020/21 contributing 10,444 Metric Tons (99.6%) of the total volumes valued at US \$68.24 million. Three grower marketers namely Jabali The Coffee Company Ltd, Maguta Estates Coffee and Tea Company Ltd and Kiongo Wa Njuguna/Mandela farm exported 44 Metric Tons (0.4%) valued at US \$0.3 million.

The average price per 50 kg bag realized by all marketers combined was US \$326.69 compared to US \$376.73 realized by the grower marketers. This is an indication that charges by marketers eat up a considerable fraction of growers values.

Total coffee earnings by farmers from the two windows (Auction and Direct sales) increased from US dollars 161.04 million (Ksh 16.90 billion) in 2019/20 to US dollars 209.48 million (Ksh 19.43 billion) in 2020/21. The average, coffee prices from the two windows increased significantly by 39% (US dollars 211.6 per bag in 2019/20 to US dollars 294.46 per bag in season 2020/21).

It is worth noting that in the present period (2020/21), the Kenya shilling appreciated against the US \$ from an average of US \$ 104.95 to 92.75 in 2020/21. This brought positive effect to coffee farmers who earned dollars.

Table 23: Earnings by farmers from coffee sales (Auction and Direct Sales) 2019/20 and 2020/21

YEAR	Auction Sales		Direct Sales		Total		Earnings by Growers (Billions-Ksh)	% Volume Of Direct Sales	Price(\$)/50 Kg Bag		
	Weight (Kg)	Value (\$)	Weight (Kg)	Value (\$)	Weight (Kg)	Value (\$)			Direct Sales	Auction	Combined

## Coffee Exports & Imports

In season 2020/21, the country exported 40,511 Metric Tons of green bean valued at US \$285.3 million compared to 45,210 Metric Tons valued at US \$204.33 million in 2019/20 while the quantity of roasted/ground coffee was 1,286 Metric Tons valued at US \$6.92 million compared to 952 Metric Tons valued at US \$5.49 million in 2019/20.

The overall coffee export volume was 41,798 Metric Tons valued at US \$292.26 (Ksh 27.07 Billion) in 2020/21 compared to 46,162 Metric Tons valued at US \$209.8 million (Ksh 22.02 Billion) in the previous season. The average price per 60 Kg bag for green coffee in 2020/21 was US \$422.61 compared to \$346.22 in the previous season while roasted/ ground coffee price was US \$322.77 compared to US \$346.22 in 2019/20. However, the combined average price per bag was higher for 2020/21 at US \$419.54 compared to US \$272.72 in 2019/20. Ironically, the price per bag of ground/roasted coffee in 2020/21 was lower than green coffee.

The top five destinations in 2020/21 included Belgium(21%), USA(15%), Germany(13%), Korea(10%) and Sweden(7%) while in 2019/20 the top five destinations were as follows; USA(20%), Germany(19%), Belgium(16%), Korea(9%) and Sweden(6%).

While the top five countries remain the same for the two season, it is important to note that Belgium improved from position three in the previous year to the top position in 2020/21. It is also worth noting that Kenya participated in Korea as a Guest Potrait country in July 2021.

There is a great potential for improvement in terms of volume shipped. Kenya acquired 8 new destinations namely; S. Sudan, Uganda, Bahrain, Oman, Ukraine, Estonia, Bangladesh and Syria to compensate for the 8 lost destinations namely; Bulgaria, Djibouti, Egypt, Hong Kong, Lebanon, Mexico, Poland and Vietman

Table 24: Coffee exports by form 2020/21

## Monthly Coffee Exports 2019/20 and 2020/21

The overall export volume in 2020/21 declined by 9% while value increased by 39% compared to season 2019/20. All the monthly export volumes for each month within the coffee year 2020/21 declined while values increased except for the month of April and July 2021. There was an abnormal increase in value in the month of May from US

\$24.01 million in 2020 to US \$73.0 million to 2021. The abnormal increase may have been a compensation occasioned by an abrupt decline having peaked in March 2021. The average monthly export volume for 2019/20 was 3.9 million kilograms compared to 3.5 million Kilograms in 2020/21.

Table 30: Monthly export volume and value

## Coffee Imports and Origins

Importation of foreign coffee has been mainly occasioned with the low trading volume availability in the country as production continues to decline over years. Local buyers are currently importing coffee both Arabica and Robusta mainly from countries like Uganda, Ethiopia, Rwanda and Tanzania. Additionally Buyers are importing value added instant and ground beans from Belgium, China, Italy and Portugal. The demand for foreign coffee in the country is driven by foreigners who have developed affinity for certain foreign brands.

Table 31: Coffee import volumes and values

Coffee year	Country of Origin	Weight(Kg)-GBE	No Bags	Value(\$)
2019/20	Belgium	1,000.00	17	1,411.65

# Domestic Coffee Consumption

The consumption of locally produced coffee in Kenya dates back to early 1970s and was previously associated with foreigners working as expatriates or in the diplomatic mission in Kenya. However, the consumption level still remained low until the concept of coffee house was introduced. The exponential growth in the number of coffee houses from only 6 in the 1980s to present 506 as shown in Figure 2 is a testimony that Kenyans have embraced the culture of taking coffee as an alternative drink to other competing beverages. Furthermore Covid-19 pandemic demonstrated the true value of domestic market for locally produced coffee beans. The domestic consumption market still needs to be grown in order for Kenya not to overrely of the export market.

The local consumption volume has increased from a paltry 509 Metric Tons in 2009/10 to present 1,655.85 Metric Tons in Table 29 indicating that Kenyan's are slowly appreciating locally produced and brewed coffee.

In the country it is common to find coffee houses in shopping malls or tucked behind a petrol pump in big towns and cities. These are places which are frequented by families or travelers who may wish to get a taste of coffee on the go. The domestic coffee market in Kenya is mainly driven by the middle-class segment of the population mainly youthful drinkers who transact their businesses while sipping coffee. Those employed in the coffee houses are mainly trendy youthful baristas.

Table 32: Consumption trend in GBE and 60-kg bags

Year	Production MT(GBE)	Local consumption (MT)- (GBE)	% Production
2009/10		509.90	1.21%
2010/11		566.60	1.55%
2011/12		629.50	1.26%
2012/13		716.00	1.80%
2013/14		744.00	1.50%
2014/15		756.00	1.80%
